

For the past 10 years, Castle Capital has been focused on acquiring lower middle market companies in the environmental industry. We help take companies to the next level by partnering with high performing management teams to maximize their potential. In addition, we can become the succession plan for founder led owners that are looking to retire.

Our approach is straight forward - buy good businesses and turn them into great growth platforms. We help the company:

Build	-out strong management teams
Evolve	into a high-performance culture that makes data driven decisions
Focus	on a small number of KPIs that can maximize operating leverage and expand margins
Empower	the management team with tools and capital to accelerate growth through organic initiatives and add-on acquisitions

The Castle team has over 30 years of combined experience investing in and growing companies, cumulatively working on over 100 transactions in excess of \$5 billion enterprise value.

What we acquire:

Castle is focused on acquiring companies that are:

- Lower middle market, focused in environmental industry
- Services, software, or technology
- Generating \$15 to \$100 million revenue
(we are also pursuing 'add-on acquisitions' that can be smaller in size)

WASTE MANAGEMENT, RECYCLING & RESOURCE RECOVERY	ENVIRONMENTAL TESTING, MONITORING & ANALYTICS	SAFETY, COMPLIANCE & INSPECTIONS
UTILITY MANAGEMENT, MAINTENANCE & METERING	SUSTAINABLE AGRICULTURE	REMEDIATION
